Project name: LockedMe.com

E-mail Id: - edwin.dass50383@gmail.com

---

Software used in project: -

Operating system: - Windows 10

Processor: - Intel i3

Language: - Java 17

Eclipse IDE Version: - 2022-03 (4.23.0)

Microsoft word: - 2015 Home & Student

Objective: - The prototype for the company Lockers Pvt., served as the basis for this project. Ltd.

Where user interaction is completely from the command line(console ). In this project, we've built the options below, where users can carry out certain operations.

- I. Displaying ascending order of file availability in the directory
- II. perform the following action in the director
  - ❖ Adding file to the directory
  - ❖ Finding a file from the directory
  - ❖ Deleting file from the directory
  - ❖ Go to main menu
- III. Terminate from the main console
- IV. Use Git to push the code into GitHub
- V. Create sprint backlog used in this project

Completed the above project as best as possible within the stated timeframe. The software I used to create this project is listed above. Also, What to do in this project as per Lockers Pvt Ltd. is listed above.  
Please give your valid input for this project.

***Thank you so much.***
